Hi Steve;

I thought you would find this of interest, as it is mentioned in the attached complaint to A2LA.

Hi Michael,

I last followed up with the DOD OIG RAC Naz Kireclick after returning from Jury Duty on Sept. 29th. I asked her if they had checked for contracts under Test America since her agent's search did not turn up anything for EMLab. She said she would check and get back to me. I am scheduled to meet this week some time with my management and will again raise the prospect of conducting a QA audit once the investigative agencies give us the green light. If they turn up contracts, they typically want to avoid interference from us conducting a QA audit. If, however, nothing turns up, I don't see any justifiable barriers. I have started looping in the Remedial project Manager of the site. - Steve

Subject: follow up

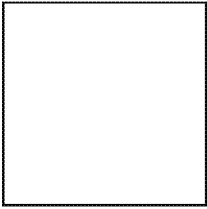

Hi Steve;

I am just following up again to see if the EPA has initiated an investigation of the data integrity issues I reported in May.

Mike
